

THE WORLD OF WATER TREATMENT

About us

EUWA water treatment solutions guarantee the highest water quality and efficiency around the world. The performance spectrum ranges from consulting to turnkey installations. EUWA majors on the development and use of proprietary technologies that are mostly protected by patents.

The company was founded in 1965 by Hanns-Heinz Eumann. His first employee was his wife Elizabeth, who actively helped him to build up the company.

First customer Gambrinus, Nagold

In 1967 EUWA took over the company Carl Morgenstern and moved into the new building at its present location in Gärtringen. There followed years of expansion at home and abroad. EUWA's commitment in Asia has been particularly successful and EUWA Singapore was founded in 1996 as a subsidiary.

The company is managed by the second generation today in the hands of Hanns-Heinz' son Michael Eumann.

The core competence of EUWA is in the water treatment technology for the brewing and beverage industry. In this area EUWA is able to look back on around half a century of experience. The business activities include the world's proven EUWA technologies as well as engineering and service.

The company specialised in the production of water treatment equipment for the brewing and beverage industry. Another focus was the process-water treatment for the textile industry as well as the boiler feed water treatment.

 Joanne Liu (Managing Director EUWA Singapore),
 Michael Eumann (Director), Wolfgang Winkler (Technical Director)

Engineering

- Design and execution of fresh water treatment projects on a customer specific basis
- Qualified and motivated engineers who understand and can solve your problems
- Use of in-house developed technology

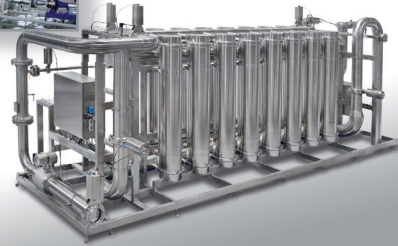

Customer Service

- After-sales Service and Service Contracts
- Teaching and training for all operators
- Online support and monitoring of systems

Systems

- **Flocculation / precipitation systems**
with optimised reactor design
- **Sand and multi-layer filters**
for iron and manganese removal
- **Special filters**
for arsenic and heavy metal removal
- **Activated carbon filters**
for dechlorination and THM removal
- **Ultrafiltration**
for particle removal, disinfection and arsenic removal
- **Ion exchange**
for softening / decarbonisation / demineralisation
and nitrate removal with EUGEMAT exchangers
- **Reverse osmosis**
for decarbonisation / demineralisation /
silica and nitrate removal
- **ClO₂ and ozone**
for disinfection
- **UV systems**
for disinfection and dechlorination
- **CALMIX® systems**
for fully automated and flexible production of
calcium non-carbonate hardness for the brewing water
- **ELIWA®**
for lime water production using membrane technology
- **LIQUICK®**
RO concentrate treatment
- **EROX®**
for modern and efficient membrane deaeration,
to remove O₂ or CO₂
- **Thermal deaeration systems**
for boiler feed water and closed condensate systems
- **Water management**
- **Water recycling systems**

References

EUWA water treatment plants are installed in over 100 countries on all 5 continents.
Here is a small extract of our reference list:

- ABInBev
- Bitburger
- Boon Rawd
- Carlsberg
- Coca-Cola
- Cooper's
- Diageo
- Erdinger
- Heineken
- Hite
- Khmer
- Krombacher
- Lion
- Lotte
- Molson Coors
- Pepsi
- Polar
- Radeberger
- ThaiBev
- Tsingtao
